Mockups A

Really like this home page, I think it's really simple and seems easy to navigate. I would consider changing the hamburger menu to separate buttons at bigger sizes, then making it go down to a hamburger menu at smaller tablet/mobile sizes, but overall works very well. Also like the color scheme and typeface choices.

Mockups B

I like this set up for the desktop site a lot more; maybe combining the desktop site from Mockup Set B and the mobile site from Mockup Set A will be the best combination for this website.

Meeting Notes: We plan to combine the desktop site from mockup B and the mobile site from mockup A to make the new mockup for the next review and to base the site off of. We'll keep the color scheme that was used in both sets as well as the typeface choices.
